

Questions you'd ask if we were sitting across the table.

The short answers to what Houses of Thought is, how it works, what AI does (and doesn't do) here, and how teachers use it in real classrooms.

SECTION 01

The basics

What this thing is and who it's for.

What is Houses of Thought?

▼

Who is it for?

▼

What framework is this based on?

▼

Do I need an account to try it?

▼

SECTION 02

How it works

The reasoning process, step by step.

What are the steps of building a House?

▼

Do I have to fill out every layer?

▼

What's the Logic Strength meter?

▼

What is Attack Mode?

▼

SECTION 03

AI and accuracy

How AI is used here — and where it isn't.

What AI models do you use?

▼

How do you prevent hallucinated sources?

▼

Does AI write my reasoning for me?

▼

Is my work private?

▼

SECTION 04

Classrooms and teachers

If you're using this with students.

Can I use this in a classroom?

▼

How do students join?

▼

What's the difference between account types?

▼

SECTION 05

Pricing and account

What it costs and how to manage your account.

Is it free?

▼

Can I delete my account?

▼

How do I contact support?

▼

Still curious?

The fastest way to understand Houses of Thought is to build one. It takes about five minutes.
