

OUR STORY

A short story about how this started.

Houses of Thought wasn't built by a company. It was built by a student, around a framework his teacher chose to share.

01

THE SPARK

I kept watching smart people make messy decisions

I've spent a lot of time watching people I respect get stuck on decisions that didn't have to be that hard. Friends agonizing over jobs. Classmates arguing past each other. Myself, going in circles for weeks before realizing I'd been asking the wrong question the whole time.

The pattern was almost always the same. Not a lack of intelligence. Not a lack of information. A lack of structure.

Build your first house.

Try it on a real decision you've been putting off.

Try it instantly →
