

AI WORKSPACE

I want to explore whether AI should be used in schools.

Let's start by exploring the different perspectives involved. Who are the stakeholders, and what do they each value?

Teachers, students, parents, and administrators all have stakes.

Great starting point. Let's build out a perspective for each — beginning with the one you feel least certain about.

Ask, explore, or build a thought...

HOUSE WORKSPACE

Students are currently
unevenly distributed by...

2 questions 60

Recent graduates and are
reshaping entry-level roles.

2 questions 72

Balance of cost, quality, and
measurable outcomes.

2 questions 58

FOUNDATIONAL ASSUMPTIONS

AI systems are sufficiently accurate for educational use under teacher supervision

Technology adoption in schools will continue to expand over the next decade

Districts can fund ongoing teacher training, not just one-time rollouts

Student-data privacy frameworks will mature alongside the technology

FOUNDATIONAL EVIDENCE

Global K–12 AI-in-education market projected to reach \$32B by 2027.

HOLONIQ GLOBAL EDUCATION OUTLOOK (2025)

Average effect size of AI tutoring on learning outcomes: d = 0.34 (moderate).

STANFORD GSE META-ANALYSIS (2024)

76% of OECD countries now have a national AI-in-schools policy or draft framework.

OECD EDUCATION POLICY (2025)
